

Decimal Pipe Kits

Help students of any age develop a real understanding of decimals with this concrete learning model.

Linear Arithmetic Blocks (LAB) use lengths of PVC pipe to represent decimals.

Each kits contains;

- 1 x one**
- 10 x tenths**
- 10 x hundredths**
- 10 x thousandths (metal washers)**
- + complimentary spare parts pack**

How would your students use it?

Students manipulate the pipes and washers to model equivalence, add and subtract simple decimals and compare the size of decimals.

A full description of this highly recommended learning aid including its benefits and further uses are outlined in the VELs Maths continuum on the VCAA website.

This product is locally made. Each kit is individually crafted to ensure accuracy ($\pm 1\text{mm}$). All edges have been finished with the safety of children in mind.

To order, contact Christine:
christine@mathsheroes.com.au
or call 0439 316 805

The price of each kit is \$80 + freight costs.
